DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6, drawn to method of manufacturing brushes, classified in class 300, subclass 21
- II. Claims 7-11, drawn to device for cutting brush fibers, classified in class 300, subclass 17.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case Group II does not require that the counter knife have rotational movement. Additionally, the counter knife and the cutting knife don't have to have the same axis of rotation.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

A telephone call was made to J. Ernest Kenney on 3/4/04 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 1744

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
